Reviews

Good electronic book and valuable one. It is one of the most incredible publication we have read through. It is extremely difficult to leave it before concluding, once you begin to read the book.

Forgotten Books. Paperback. Condition: New. This item is printed on demand. Dimensions: 9.0in. x 6.0in. x 1.3in. Excerpt from Proceedings of the Royal Society of London, Vol. 81: Series A, Containing Papers of a Mathematical and Physical Character If i is comparatively feeble, and therefore 8 small compared with R_0 , this equation makes proportional to and since 72 . Is not very different from 1 for red light, the change of resistance is roughly proportional to the fourth root of the intensity. A peculiarity of my seleno-aluminium bridges which must be mentioned is this: after the bridge has been in use for a considerable time (perhaps some months) its resistance for high voltages is extremely unsteady. Thus, a bridge which had been much used had a perfectly steady behaviour with 2 volts, but with 6 volts the spot on the scale moved with great suddenness over large distances, the bridge being all the time in the dark.
