General Books LLC. Paperback. Book Condition: New. This item is printed on demand. Paperback. 98 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1909. Excerpt: . . . The late Dr. Hermann Brehmer was of opinion that the later-born members of a family were more liable to consumption than the older ones, probably because the mothers constitution is apt to be exhausted by the trials of repeated maternity. Dr. J. E. Squire estimates the proportion who become tuberculous as about 33 per cent. among the children of consumptive parents, against about 24 per cent, among the children of non-tuberculous parents. Probably the only authority who believes tuberculosis to be usually directly inherited from the parents is Baumgarten. IV. --SYMPTOMS AND DIAGNOSIS This section includes notes on the clinical course of pulmonary disease, on latency, the chief symptoms, the physical signs, the various forms of the tuberculin test, and the opsonic test. 22. The Clinical Course of Pulmonary Tuberculosis. Pulmonary tubercle may begin insidiously or suddenly. The symptoms may follow some other illness, such as influenza, pneumonia, pleurisy, or bronchitis, or after accouchement. In such cases convalescence is incomplete, and after a while positive evidence of tuberculosis is obtained. In other cases the disease may apparently date from some overexertion, overstrain, or injury. In yet other cases--fortunately, a minority--the disease begins in an acute form with high fever and rapidly progressing lesions in the chest. These are the cases of acute caseous pneumonia and of acute miliary tuberculosis, popularly grouped together as galloping consumption. Most cases probably begin insidiously, remain slightly febrile for weeks or months, without marked constitutional deteriora Hygienic Prevention of...
