Such surveys can be sent to manufacturing or service managers to collect empirical data on their operations for research purposes. The metrics can be used to measure constructs such as Total Quality Management, Just-In-Time manufacturing, Operations Strategy, Technology Management, Supply Chain Management, performance of operations and related concepts. Each article is summarized in a standard format consisting of the following elements: Citation: The citation for the article being summarized. Measurement Description: How the measurement was done. Whether the scales were grouped into factors and what format was used (e.g. Likert) for the scaling of the questions. Development: What process was used to develop the scales including pre-testing, split sample approaches, exploratory factor analysis or other methods? Sample: What data were collected to demonstrate reliability and validity? Who received the surveys (e.g. managers, nurses, students)? What was the sample size and the response rate?
